

Dynamis, Inc. is a professional services and IT firm that provides scalable, flexible, and adaptable solutions to enhance preparedness, reduce risks to people, property, and business, and manage crises.

Safety, security, and resilience require a systematic and integrated approach for the threats that pose risks to communities, businesses, and organizations, as well as their citizens, customers, and employees.

Dynamis has extensive past performance providing tailored solutions and innovative tools to national leaders, educational institutions, first responders, militaries and civil agencies, airports and ports, sports and entertainment venues, and many others.

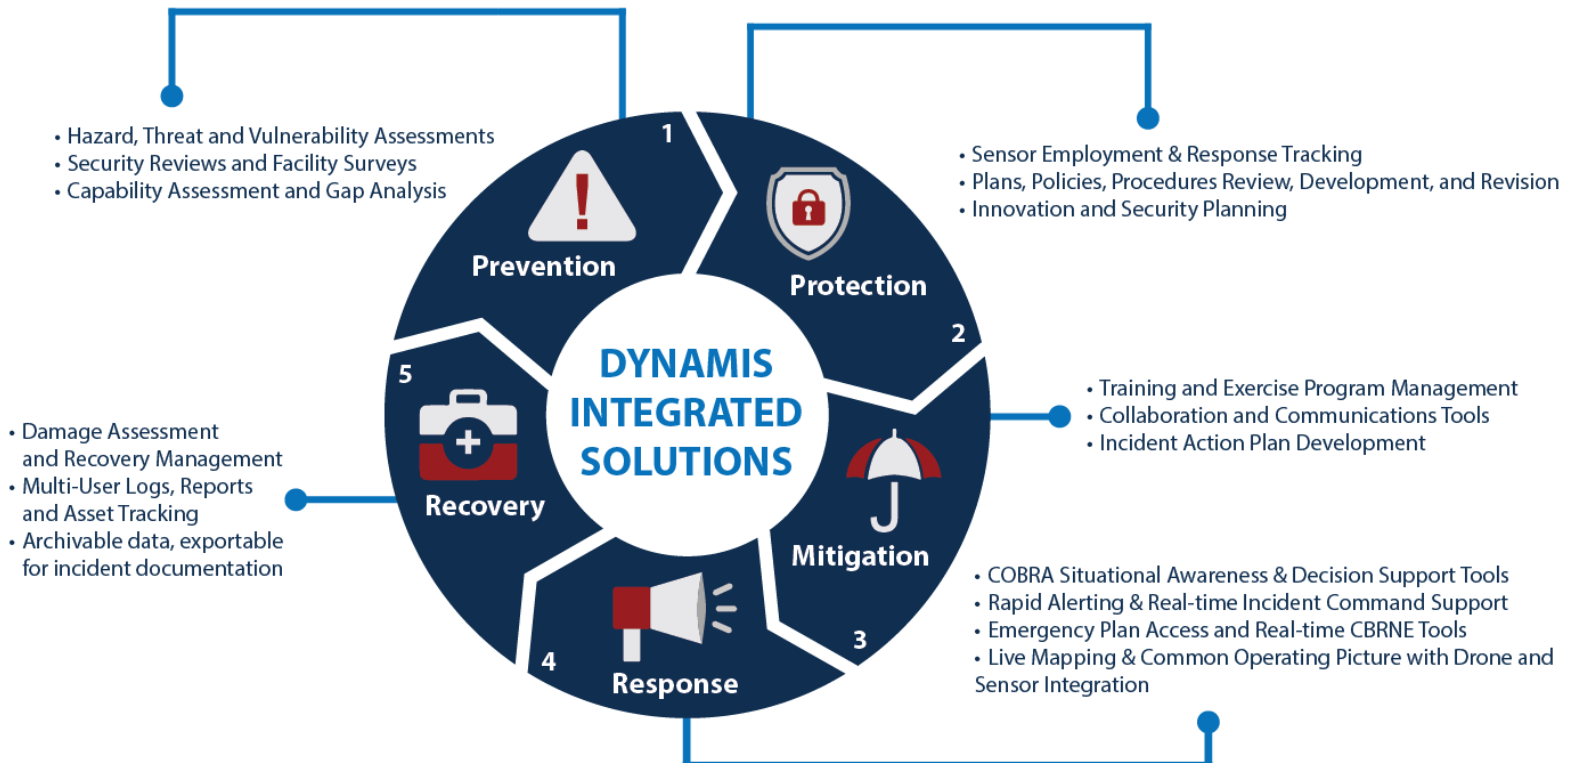

Customers experience the Dynamis difference through our experienced operators, professionally-certified experts, and our suite of proprietary tools, which provide comprehensive support throughout the lifecycle of prevention, protection, mitigation, response and recovery.

Driven by internationally-recognized incident management best practices and live sensor data, Dynamis' COBRA™ technologies provide an integrated platform for real-time collaboration, information sharing and decision support.
